A REWARDING CAREER IN A GROWING FIELD

With people taking in household pets more now than ever before, the demand for skilled Veterinary Assistants is on the rise. According to the U.S. Bureau of Labor Statistics, the demand for professional Veterinary Assistants will rise 26% by 2012. Pet owners increasingly take advantage of veterinary services, spurring employment growth for Veterinary Assistants.

The Veterinary Assistant Course will teach you valuable information about animal-related issues from care and handling to veterinary practice and administration. Prepare to become a part of a professional veterinary staff, work at a
